The screenshot shows the 'Browse Repositories' dialog in IntelliJ IDEA. The search bar at the top contains 'Cucumber'. The search results list three repositories: 'Cucumber for Groovy', 'Cucumber for Java', and 'Cucumber for Scala'. The 'Cucumber for Scala' repository is selected and highlighted in blue. The details for 'Cucumber for Scala' are shown on the right, including the 'Install' button, which is circled in red. The details also show 8,488 downloads, updated on 22/12/2015, and version v0.3.3. The description states: 'Enables Reference tracking of glue code when using cucumber-scala DSL. Requires Scala language integration from Community Repo and the JetBrains cucumber plugin. Issue tracking at https://github.com/danielwegener/intellij-cucumber-scala/issues'. The change notes and vendor information are also visible.

Repository Name	Downloads	Stars	Updated
